

## STORAGE & LOGISTICS

**Total Energy Solutions** offers onsite storage and maintenance for customer owned generators. It is more cost effective to have TES maintain your single or multiple power units on our yard. This allows your company to protect multiple facilities without a dedicated unit for each location.

We will also accept responsibility to promptly mobilize your generator(s) from our storage yard to your specified location.

Our storage facility is protected around the clock by a state of the art security system which is monitored off-site via video surveillance.

## PORTABLE POWER DISTRIBUTION

Not only does Total Energy Solutions provide solutions to help you generate power, we also provide solutions for getting that power where you need it. As a distributor of Power Temp Systems, Inc we can provide:

- Temporary Power Centers
- Portable Distribution Panels
- Docking Panels
- Spider Boxes
- Portable Transformers
- Custom solutions designed for your unique needs

Portable Power Distribution

**Total Energy Solutions, LLC** was founded out of the growing need for a quality generator sales and service company that understands the services and products required in the power generation market. Our company's founders possess more than 60 years of combined experience in the power generation market, so you can rest assured that we truly understand the needs of our customers.

Total Energy Solutions places heavy emphasis on service. Our experienced team is available 24/7/365 to service all generator brands and sizes. We are the authorized distributor for industry leading generator brands including Taylor Power, Cummins and Kohler to name a few.

With locations in Lafayette, Baton Rouge and Houston, Total Energy Solutions serves a wide variety of industries, from Oil & Gas, to Healthcare and Manufacturing.

# Service Beyond All Expectations!

## SALES & RENTALS

**Total Energy Solutions** is proud to offer only the highest quality products to our commercial and industrial customers.

### PRODUCTS

- Diesel Generators from 9kW to 3250kW
- Natural Gas Generators from 20kW to 1.9mW
- Gasoline Generators from 5kW to 10kW
- Automatic or Manual Switch Gear
- Prime Power NG Rentals from 20kw-350kw
- UPS - Battery Backup Systems
- Auxiliary Fuel Tanks
- Turnkey Generator Installation
- Rentals from 150kW to 1500kW
- Storm Switches

### NO POWER = NO REVENUE

When the power goes out, business shuts down and losses add up. Consider the consequences of power outages for your business:

- No telephone or computer systems
- No lights or security system
- Perishable Inventory spoils
- Damaging power surges
- Customers look elsewhere for your products or services

### BE A HERO FOR YOUR COMMUNITY, BE OPEN FOR BUSINESS.

## SERVICE & MAINTENANCE

**Total Energy Solutions** offers flexible, customized maintenance programs and fast, reliable 24/7/365 emergency service response. Preventative Maintenance programs are tailored to each customer's unique needs and can be scheduled monthly, quarterly, semi-annually or annually. Ensuring that your emergency backup generator system is ready when needed is of vital importance. A scheduled routine maintenance program will increase the reliability of your standby power system and ensure that your generator will perform when you need it.

### SERVICES

- Fast, Reliable Expert Service
- Factory Trained Technicians
- Customized Maintenance Programs
- Resistive Load Bank Testing
- Fuel Service/Polishing
- Onsite Storage and Maintenance
- Rentals during extended service outages

Standard PM program includes the following:

- Change all fluids and filters annually or every 250 hours of operation
- Inspect batteries, hoses, belts, radiator cleanliness and fluid levels
- Function test engine, generator, and switch gear
- Check all safeties for proper setting and operation
- Check all battery connection posts and cables
- Check fuel quality for water content and bacteria
- Engine oil analysis
